### About Cork:

**Cork is 100% natural, eco-friendly, biodegradable, waterproof, and its extraction helps the cork tree renew itself.**

Cork is a wide range application material, adapting itself to the environment without any problems, and it is a material of immense value, in vogue due to its ecological capabilities and environmental friendliness.

**Caring for Cork:** Clean with a damp cloth and a mild cleaning product, when necessary. Do not machine wash. Not suitable for microwave use – keep from prolonged exposure to direct sunlight to prevent discoloring. When in contact with water, cork will temporarily darken; allow to dry thoroughly before putting your cork object away.

Avoid contact with soapy or greasy water as that can stain the material. Cork is a natural raw material; its appearance, namely color, may alter with time, without loss to its intrinsic properties.

Keep your hands clean and your dishes dry in style.

Our new collection of kitchen towels mix and match perfectly with our Casafina collections. Made of pure cotton, they are absorbent and that makes them perfect for drying items like cookware, glassware and dinnerware. They are tightly woven, which makes them capable of withstanding many years of use.

## Our commitment

With the increasing demand for sustainable growth, Casafina has made this our priority. The effort to go green and to minimize our impact on the environment is (always) a work in progress. It is no small task – yet for us, it's one of the most important. We commit ourselves daily to protect the environment, avoiding unnecessary harm through the resources we use and the products we manufacture.
